REASONS FOR ALLOWANCE

1. Claims 2, 7, 11, 17, and 22 are cancelled.
2. Claims 1, 3-6, 8-10, 12-16, 18-21, and 23-27 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The prior art of records fails to disclose or render an obviousness of a signal processing building block for use in an adaptive signal processing system comprising: a main and an auxiliary input channels; a processing mechanism that generate a complex adaptive weight including a sample median value of a ratio of a main input weight training data signal to an auxiliary input weight training data signal; as applies the computed complex adaptive weight to generate an desired output signal as cited in independent claims 1, 3-4, 6, 9-10, 12-14, 16, 18-20, 23-25, and 27.

The closest found prior arts are Gerlach (U.S. 4,797,807) and Amitay et al. (U.S. 4,606,054). Gerlach in view of Amitay et al. disclose a signal processing building block for use in adaptive signal processing system comprising a main and an auxiliary input channels and a processing mechanism that generate an adaptive weight and applied this weight to generate the desired output signal. However, neither single nor combine of Gerlach or Amitay et al. discloses or suggest the complex adaptive weight including a sample median value of a ratio of a main input weight over an auxiliary input weight.
